

## LANHAM NEWS

Welcome to Lanham News -- a quick roundup of Lanham product and services updates, Microsoft news and other developments affecting our end customers and partners. We'll be sharing more of this type of information in the future with you, so if there is someone else in your organization we should add to our mailing list, please let us know by emailing [education@lanhamassoc.com](mailto:education@lanhamassoc.com).

## RECENT PRODUCT RELEASE:

### **SEO Version 60.09 was released September 8, 2015.**

This release includes several changes to the UPS functionality offered in Lanham E-Ship, such as:

- 2015: Dimensional weight threshold for UPS Ground and UPS Standard to CA has been removed.
- 2015: The UPS label has been enhanced to support a smaller format that fits on a 4" x 4" label stock. A two-dimensional barcode will be included on the Pickup Summary Barcode Report (UPS Manifest label).
- 2015: The maximum declared value limit has increased to greater than \$50,000 for eligible UPS shipping accounts.
- Saturday Delivery is no longer available for World Wide Saver.
- UPS World Ease was added to this release, but must still be licensed separately via the UPS World Ease module in Lanham E-Ship.

AND, this release also includes UPS SurePost® using UPS Web Services.

UPS SurePost®, a contractual service for non-urgent residential packages ranging in weight from 1 ounce to 70 pounds, combines the consistency and reliability of the UPS Ground network with final delivery provided by the U.S. Postal Service. It can provide significant shipping savings over traditional ground services by eliminating hefty delivery area, residential, and Saturday delivery surcharges.

## E-SHIP UPDATES:

### **It's Past Time to Move from UPS HMU to UPSlink!**

UPS and Lanham Associates no longer support UPS' HMU manifest for E-Ship. Customers needing to move should contact their reseller directly for assistance in making the move to UPSlink. If resources are tight, Lanham Services may be able to assist with the upgrade. Click [here](#) for further incentives to move to UPSlink.

~~HMU~~

### **Heads Up!! UPS Charges for all Packages Put on the Manifest!**

Heads up to our resellers and E-Ship end user customers: Please be aware that whether packages are shipped or not, if they are added to the manifest, UPS charges for them! If you have packages on the manifest that you don't want to ship, you'll have to remove them. Click [here](#) for more details on how to void a manifested UPSlink shipment.

### **Avoid Postal Service Chargebacks!**

Please be aware you should be on Lanham's E-Ship version SE0.60 or higher to satisfy USPS requirements for FedEx SmartPost. Customers wishing to continue using this service need to upgrade from prior versions. If shippers continue to use prior versions, the shipments will still process, but the shipper may face chargebacks from the Postal Service. Check with your reseller to be sure you're on the correct version.

### **Other "Weighty" E-Ship News**

In version SE0.60 we have added support for USB scales for Mettler Toledo and Fairbanks scales. Find more information about supported hardware requirements for Lanham E-Ship [here](#).

## LICENSING UPDATES:

### **Compatibility – Synching Lanham/NAV Licenses ...**

Did you know Lanham Associates' solution licenses follow the nature of Microsoft Dynamics NAV licenses? In other words, Subscription NAV systems require Subscription Lanham licenses, and NAV Perpetual licenses require Lanham Perpetual software licenses. Lanham products, however, are not available in the SPLA licensing model.

If you have questions, please check with your reseller.

### **Supported NAV Versions**

New Lanham products and future enhancements will only be supported in NAV 5.0 through NAV 2016 versions.

## SERVICES UPDATES:

### **Expanded Warehousing Implementation and Consulting Resources**

Lanham Services has added a number of NAV Warehousing experts to its team and has expanded its Warehousing implementation services. In addition to regular Lanham ACE Warehousing implementation services, we're now available to provide your customers with implementation and consulting services for base NAV Warehousing implementations, as long as the customers are currently using Lanham E-Receive or E-Ship products.

Please see our contact information below.

## UPCOMING EVENTS & EDUCATIONAL OPPORTUNITIES:

### **Educational Webinars:**

Check out our new line-up of webinars [here](#).

Lanham AFP customers - There's still one webinar left in our special [Forecasting Forum series](#) recapping and expanding upon topics covered during the 2015 Forecasting & Replenishment Forum. If you'd like to see any of the earlier sessions, please email us at [education@lanhamassoc.com](mailto:education@lanhamassoc.com) for the recording link.

Best Regards,

The Lanham Team
