

LEARNING WITH LANHAM

As we head into the end of the calendar year, we wanted to let you know about the upcoming webinars and classes listed below.

We are dedicated to ensuring long-term success for our partners and end customers by providing high quality training and education. So please be sure to add these sessions to your calendar, and watch your in-box for additional learning opportunities.

If there is someone else in your organization we should add to our mailing list, please let us know by emailing education@lanhamassoc.com.

We truly appreciate your business!

WEBINARS:

Get Crystal Clarity with History Management

End your frustration with having changes made to your NAV database, and not knowing who made them. History Management from Lanham Associates can provide you with crystal clarity on changes made, tracked by user ID, date and time.

No more wrestling with accounting to get access to the NAV Change Log. No more pouring through pages and pages of data, trying to figure out where your transaction information is located.

In fact, History Management can easily track changes to quotes or sales orders. It can also provide valuable information for your Sarbanes-Oxley and FDA CFR-21 compliance.

History Management makes it easy for authorized users in Microsoft® Dynamics™ NAV to track changes made to all records with an easy-to-use button and simple setup. Join us for this informative webinar where we will demonstrate:

- The differences and advantages of History Management versus the NAV Change Log
- How to quickly and easily view the changes made to your NAV database

- How to find that Sales Order number and see all changes made starting from the posted invoice
- How to add accountability around system changes in your environment...and more...

We will answer questions about installation, migration and anything else you need to know.

[Register now](#) for the "Get Crystal Clarity with History Management" webinar scheduled Wednesday, December 16 @ 2 p.m. ET.
